# “Three Ways To Light Up Your Life with Enskoncedesign”

1- Engagement Pendant - Circle Small

2- Engagement Pendant - Circle Large

The **Engagement Pendant Series** is a perfect way to brightening up your next project. The reflective nature of the Engagement Pendant is reminiscent of the designer’s inspiration- *Rainy Nights and City Lights*. Depending on your vantage point the reflection of a candle may appear from across a busy restaurant. You may catch a glimpse of the sun setting even if you’re the nice one with your back to it.

## About Us:

**Enskonce Design is an award-winning design firm based out of Oakland.** We design furniture and lighting products for the residential, commercial and hospitality industries.

Enskonce Design originated from a passion to produce exquisite design creations that evoke a certain harmony between simplistic style and discriminating craftsmanship. The knowledge and skill behind the unique designs are attributed to Robert Dombroski, who leverages his experience from Disney's Imagineering and being lead designer on a number of multi family-dwelling remodels.

Rob and Luciana are continually inspired by the growth and redevelopment of a bustling Bay Area as well as the inherent beauty of the nearby Redwoods and shoreline. Our products have been featured in prominent publications such as Interior Design, Wallpaper, Metropolis, Shelter Magazine, and ABC 7 Chicago to name a few.

Rob mentoring at Oakland "Build" program. The girls have done such a great job coming up with different products to bring to market and sell. Luciana started mentoring the girls as freshmen and they are now entering their senior year of high school. Luciana brought Rob into the Build program to help with production techniques and mold making.

Luciana is the exquisite Devo dancer behind Enskonce Design. She's always excited to meet new people and has a smile on her face. She especially loves slinging cheese as a cheesemonger for Gus's Market in the city. When she's around you'll have a blast, but most cases she's in...you guessed it ...the City
